

## How to Stop Nursing Home Revenue Loss & COVID-19 Viral Transmissions Quickly & Inexpensively

**FDA-REGISTERED PATENTED MOUTHWASH &  
ORAL SPRAY PREVENTS TRANSMISSION OF  
COVID-19 & THE SARS-COV-2 VIRUS**

**Iodine Products: Anti-Viral/Anti-Bacterials for  
Hospitals, Nursing Homes, ALFs, Adult Day-  
Care and their Residents & Staff**

8025 SW 63<sup>rd</sup> Place  
So. Miami FL 331243

# 20 Years of Clinical Research Shows That DISEASE TRANSMISSION CAN BE PREVENTED

A blend of molecular & ionic iodine & other adjuvants kills all known viruses (including coronaviruses), infectious bacteria, parasites, & fungi in 30 seconds.

Available in BOTH oral/nasal spray and mouthwash/gargle packaging. This product's ingredients have been clinically proven to rapidly kill (in 30 seconds):

- Ebola virus
- Bubonic plague (*Yersinia pestis* - all 3 species)
- Enveloped/Coronaviruses (SARS-CoV-2 HBV, HCV, HIV, influenza, etc.)
- Non-Enveloped Viruses (adenovirus (AdV), HPV, polyomavirus (PyV), etc.)
- All infectious disease bacteria, including MRSA & VRSA, Legionnaires
- Amoeba (like *Naegleria* - brain-eating amoeba - & *acanthamoeba*)
- Fungi
- Molds

There's an extra benefit with use: many older and middle-aged people are iodine deficient, for a host of complex reasons. Our mouthwash and spray products address subtle and very basic issues associated with iodine deficiency.

- Iodine enhances the production of HDL cholesterol, while lowering LDL-VLDL-IDL cholesterol. Iodine helps prevent atherosclerosis.
- Iodine encourages the production of lipoprotein lipase, which breaks up clot-producing lipids and lowers triglycerides. Iodine may prevent CHD.
- Iodine is central for the production of thyroid hormones (triiodothyronine and thyroxine, or T3 and T4), which regulate the body's basal metabolism.
- Iodine empowers white blood cells (leukocytes) to prevent infections.
- There is good evidence that iodine improves mental acuity and fights dementias like Parkinson's disease, Alzheimer's and Huntington's.
- Iodine is necessary for cell proliferation in the hippocampus, and helps to slow mental decline and prevents formation of Reactive Oxygen Species.

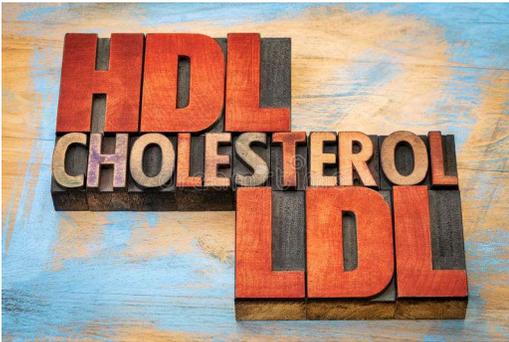

## HOW MUCH IODINE & WHAT TYPE OF IODINE?

Ingested iodine changes iodide in stomach and intestines and moves into the blood stream. Some molecular iodine is directly absorbed in the mouth and circulated to the brain, eyes and other local organs. The serum fraction of the blood carries iodide to all endocrine and non-endocrine organs and tissues. 20-30% of ingested iodine creates thyroid hormones. Non-hormonal iodine is absorbed throughout the interstitial and extracellular matrix, and participates in millions of routine maintenance, growth and replacement events.

No cell is born or dies without a molecule or ion of iodine. The salivary glands are the 2<sup>nd</sup> largest repository of iodine in the body (after the thyroid). They use it to locally fight incoming infectious disease organisms and provide a framework for rapid cellular growth and safety throughout the nasopharyngeal/oral cavities.

Good health and HDL/LDL regulation require both ionic and molecular iodine.

Molecular iodine has been demonstrated to actively fight breast cancer cells, in vitro & in vivo. Via lipoprotein lipase, iodine increases HDL & lowers LDL (bad) cholesterol.

Laboratory Test		Notes	High Risk	Intermediate Risk
Total Cholesterol (mg/dL)				
LDL-C Direct (mg/dL)			248	
HDL-C (mg/dL)			164	
Triglycerides (mg/dL)				
Non-HDL-C (mg/dL) (calculated)				59
apo B (mg/dL)			189	158
-P (nmol/L)				
LDL-P (nmol/L)			122	
(mg/dL)				

## PROGRAM FOR HOSPITALS, NURSING HOMES, ALFs, LTC & Hospice Care

1. RESIDENTS: Assess their ability to use gargle, nasal spray or both.
2. PERSONAL PACKAGING: Private dispensing bottle for gargle &/or spray.
3. LONGEVITY: Gargle: one scant tablespoon ( $\approx 9$  ml) up to 6x/day.  
Spray: 3x-6x/day. Package lifetime is typically one week.
4. COST: 100/set; \$1.00/unit for both gargle and nasal spray.
5. DISCOUNTS: Sets of 500+ provide a 20% discount.
6. STAFF: Increased usage pattern recommended for all facility staff.

FOR FURTHER INFORMATION: Email [erosov@iodineproducts.com](mailto:erosov@iodineproducts.com) or call 305 667-9375 at any time, day or night. We answer the phone 24 hours a day.

"The use of this company's products in the healthcare environment could substantially reduce transmissibility of the COVID-19 virus." *Michael Martin, MD/MBA/MPH - Assoc. Clinical Professor, University of California San Francisco, Department of Epidemiology and Biostatistics*

"Iodine Products' mouthwash and nasal spray are formulated to help stop COVID-19 transmission." *Henry Gelband, MD (retired., Professor of Pediatrics & Pharmacology, University of Miami - Miller School of Medicine)*

"Iodine is a required elemental nutrient with a well-established safety profile. Although typically thought of in the context of thyroid disease, it has known activity in cancer prevention and supports effective intrinsic immunity; no coincidence that the Japanese, who consume 2000 to 3000 ug of iodine per day on average, have a 30- to 60-fold lower rate of Covid-19 deaths." *Jeffrey Tarrand, MD (Prof. of Pathology & Laboratory Medicine)*

"I have long been a believer in iodine. The nasal spray/mouthwash (surprisingly pleasant taste!) is an important tool in my arsenal against COVID. Between those and my daily routine iodine/selenium supplementation, I haven't ever missed a day's work in my university professorial duties. These are important tools to protect yourself!" *Purnendu Dasgupta, Professor of Chemistry & Biochemistry, University of Texas at Arlington.*
